

# FERTIVITIS

## Fertilizer burier

FERTIVITIS is a fertilizer spreader that allows to insert the product into the soil between the rows of vineyards or orchards. FERTIVITIS has a rigid toolbar and a stainless-steel tank. The blade coulters are equipped with depth gauge toothed rollers. It is available in 1 or 2 rows version. The working row spacing available on the 2 rows models, is either 1.4 or 2.00 m.

### FERTIVITIS - MODEL 1700
